

EIFFEL

Lolium perenne

- High production in late season
- Low aftermath heading
- Late heading diploid
- Good persistency

Summer & Autumn growth improvement

The weak point of perennial ryegrass is the low production in the summer. EIFFEL is an improvement showing higher drymatter yield in summer/autumn.

Excellent choice for grazing

With high drymatter production, growth through all seasons and very few stems in the regrowth, EIFFEL is an excellent variety for grazing.

Late heading

EIFFEL is a late heading very persistent variety.

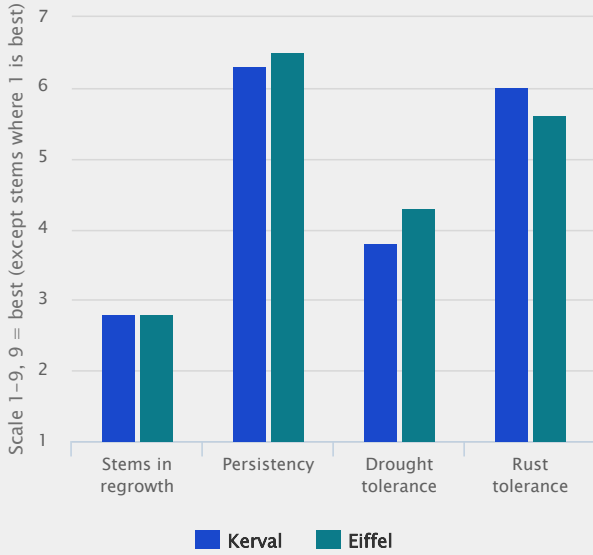

Technical Specifications

- Perennial ryegrass
- Excellent growth in summer/autumn
- Listed/recommended in EU
BE
- Lateness: Late
